

FOR IMMEDIATE RELEASE

Westwin Elements Accepted into CISA's Critical Manufacturing Sector Coordinating Council (SCC)

Westwin, [7/10/2024] – Westwin Elements is pleased to announce its acceptance into the Critical Manufacturing Sector Coordinating Council (SCC) by the Cybersecurity and Infrastructure Security Agency (CISA), designating Westwin as a Critical Manufacturer. This membership positions Westwin as a key player in national security and resilience efforts for critical manufacturing facilities across the United States.

Membership in the SCC grants Westwin access to the Critical Infrastructure Key Resources Information Sharing Environment (CIKR ISE). This platform facilitates secure discussions, document sharing, and ongoing situational awareness with vetted sector peers and government agencies.

"As we embark on this new journey with the SCC, we are excited about the opportunities it brings to strengthen our commitment to national security and resilience," said KaLeigh Long, CEO of Westwin Elements. "This membership underscores our dedication to safeguarding critical manufacturing operations and ensuring our readiness to face evolving security challenges."

Westwin looks forward to engaging with the CISA team in upcoming discussions to further address security needs and prepare for future initiatives.
